SUBJECT

Improvement of the supply of water to the Krishnarayanagaram town

---

file D P 16
D C Mysore
Comptroller
Chief Engr. Irrigation
L. 6675-K dated 10.4.45
Corrections the estimate

25/2

From the D c Mysore

No D 3 c 687/43-44 dy 16 9 43

Requests sanction to replace the existing 4" rising main by 6" rising main at Krishnarayapuram in order to improve the efficiency of the water supply of the Town as the present supply is inadequate.

1) In view of the urgent necessity recently felt by the Pdt of the local bd of for the improvement of water supply of the Town the sanitary Engineer suggests two alternative estimates

a) one for Rs 22,800/- for laying 6" rising main from pumphouse to filters and a duplicate 4" rising main from filters to the storages tank, making use of the released pipeline together with its fittings from the 1st line

and b) second for Rs 17,435/- for laying a 4" c I duplicate rising main

2) But the Engineer recommends the 1st estimate for Rs 22,800/- being taken up and the D c requests that the work may be executed early in order to give relief to the people of the Town The entire cost being met by govt, as resolved by the local bd el

21) Subd:
An estimate has been prepared
by the Bureau of Economy & Engineering
for Rs 28,700/- for laying 6" mains

main from pump house to filters and a duplicate rising main from filters to the storage tank in connection with the improvement of water supply at Krishnarajanagar. The estimate has been scrutinised by the chief Engineer for Irrigation and found to be correct.

2) Hence the urgency and necessity of taking the above work early in order to give relief to the people of Krishnarajanagar Town is also distressed by the D type of and the recommends that the entire cost in this behalf may be given as an outright grant in view of the slender resources of the Municipality as prayed for by the local Municipal Council.

3) In this connection it may be stated that the financial position of the Krishnarajanagar Municipal Council for 44-45 as per sanctioned budget is very unsatisfactory, as seen from the margin ally noted figures. The question of taking up the drainage work at the place was also raised to be dropped, as the Municipal Council

×Receipts — Rs 32,581
Expenditure — 32,471
closing balance — Rs 110/=

were not prepared even to take a loan from the govt to finance them shares of the cost towards the drainage scheme though govt ~~advised them~~ & were prepared to meet 2/3 of the ~~entire~~ estimated cost of the drainage scheme Further, the Krishnarajanagar ~~Taluk~~ municipal was recently converted to a Town ~~Panchayat~~ and they have ~~to~~ to make up a deficit of Rs 1,500/- per year which was ordered to be discontinued from out of the funds of the Mysore Dt Board towards the maintenance of the local municipal high school

Something has to be done in pursuance of the file ref 19-12-60

24) In view of the facts mentioned at para 23 supra the prayer of the Krishnarajanagar municipal, as recommended by the D Mysore Dt for the entire cost of Rs 28,700/- being given by the govt as an outright grant deserves consideration

25) In the circumstances, my submissions are

1) Sanction to an estimate for Rs 28,700/- for the improvement of water supply at Krishnarajanagar

Krishnarajanagar water supply

Continuation Sheet | File No / Current No | of | Page 2437

2) sanction to a grant amount Rs 28,700/ from out of the W.S.S. grant for 44 - 45 towards the entire estimated cost

submitted

16/12 The estimate for Rs 28700 which has been scrutinized by the Chief Engr for Irrigation may be approved

In regard to the meeting of the above cost the Dy Commr has recommended that the sanctioning power vested by the Govt in the H.L.C. may be advised to meet at least the extra cost when amount to Rs 7200/ (approx)

The H.L.C. which has been recently constituted has to supply about Rs 1 lakh towards to improve its finances

for order

Law Secy 16/12/44

It should be possible to finance the cost from the grant of Rs 1 lakh. The Govt may grant Rs 3/4 as a special case

The estimate for Rs 28700/- may be

SECY LAW DEPT 1 1943 GOVT OF MYSORE

To

C. Narayanaswami Naidu, Esq., B A., B L.,
Secretary to the Government of Mysore,
Law Department, Bangalore

Sir,

Subject - Improvement of the supply of water to the Krishnarajanagar town.

In forwarding herewith the file of records ending with report No.H C 59/42-43 dated 27th July 1943 received from the President, Minor Municipal Council, Krishnarajanagar, on the above subject, I have the honour to state that the Municipal Council at their meeting held on 23rd July 1943 resolved that the existing 4" rising main pipe line of Krishnarajanagar town water supply be replaced by 6" rising main to meet the urgent needs of the people of the town for drinking water and that the work be undertaken by Government

Though Government undertook to lay pipe line at a heavy cost of Rs. 80,000/- during the year 1928 for the supply of water to the town proper provision was not made for the increasing population of the town nor sufficient water facilities provided for more than 5,000 head of cattle of this chief Agricultural town at the time when the scheme was prepared As such there has been a perpetual cry for better supply of drinking water by the public In the year 1938, Government were pleased to sanction a further estimate for Rs 26,500/- for improving the supply, the cost being met both by Government and the Municipality The Municipal quota was paid mainly with the idea of expediting the work The improvements effected were

i) Deviating the channel to avoid the rain water flowing from over the ploughed fields into the storage tank and thus to check turbidity of drinking water,

ii) Installing an electric Motor and pump with a view to increase the pumping capacity,

iii) Erecting another Jewel Filter and

iv) Effecting some very urgent improvements to the distribution

Even these arrangements were not adequate for a sufficient supply of water to the town for the reason that with the improvement of the pumping capacity the capacity of the rising main was not simultaneously improved and increased Added to this the existing 4" main has thick incrustations inside the pipe line decreasing the capacity of the line from 4" to not more than 2" Technical opinion is that this difficulty for better supply of water could be completely got over by substituting the present 4" main by 6" main for which the present pumping unit of 20 Horse Power Engine was designed The

Council have resolved that the Government might be requested to take up this work, the entire cost thereof being borne by them. In this connection, I wish to add that unless the present rising main is increased to 6" the work so far done at a huge cost will be of no avail.

The distance over which the 6" main has to be laid is about 10 furlongs in the same line in which the present 4" main exists.

It is reported that the Mysore Iron Works, Bhadravati can prepare pipes of 6" diameter within a period of 8 months after booking the order.

As this work is most essential and an urgent necessity, for the town, I request that sanction of Government may be kindly obtained for carrying out the above work at their cost so that the people of the town might be relieved of their water-difficulty.

I have the honour to be,
Sir,
Your most obedient servant,

Deputy Commissioner,
Mysore District.
